

Cleereman's Sawmill Machinery Is Simply The Best!

Satisfied Customers Have Built Our Business and Here's Why...

"In the 7 years that we have run this carriage, the only carriage parts that I have needed from Cleereman have been wear strips and shuttle ball valves. That cost a total of \$1,094, and they were in stock for prompt delivery. Fran's carriage is reliable, robust and simple to maintain and operate. It is made with a minimum number of wear points and parts and therefore reliable by design. It is the only piece of equipment in my mill that hasn't cost me money."

F.S. "Skipper" Beal
